Communications (MOTC) of Myanmar to significantly enhance its existing network. By integrating satellite solutions into its own network, the MOTC will be able to dramatically increase its overall network bandwidth, speed and reliability as it expands 3G and 4G services into the more remote areas of Myanmar. It will also ensure that communities have access to a broad range of government services, including healthcare and education. The satellite will provide critical e-banking services as well as distribute informative and entertaining content to viewers throughout Myanmar.

Intelsat 39 is expected to enter service in the fourth quarter of 2019.

Intelsat Safe Harbor Statement:

Statements in this news release constitute "forward-looking statements" that do not directly or exclusively relate to historical facts. When used in this

Designed with wide-beams and high-powered steerable spot beams, Intelsat 39 will deliver high-speed agile connectivity services. The steerable beams will provide additional flexibility, enabling customers to rapidly reposition their service to respond to changing application or geographic requirements. The satellite's C- and Ku-band capabilities will add scale to our Intelsat Flex managed services, enhancing mobile connectivity for aeronautical, maritime, enterprise, and government customers operating across these geographies. Intelsat 39 will replace Intelsat 902 at the 62°E orbital location.

"Intelsat 39 adds to the breadth of services and vast geographic reach that our global network provides," said Stephen Spengler, Intelsat's Chief Executive Officer. "Businesses and communities across three continents will have greater access to robust, reliable and resilient connectivity services whenever and wherever they need it."

Intelsat 39 will host both C- and Ku-band satellite services for [Myanmarsat-2](#) which will enable the Ministry of Transport and
